▼ *GALVOLABEL machine complete with*
***LABEL GENIUS CAMERA** (option)*

LABEL GENIUS CAMERA

Ideal to obtain **perfectly shaped labels**, even in the presence of ribbons which have not been woven correctly.

AVAILABLE FOR:

GALVOLABEL   GALVOLABEL XL   LASERLABEL XL 2.0

EASY TO USE

Even an unskilled worker can operate the program easily.

INCREASES PRODUCTIVITY

Makes it possible to work on multiple ribbons simultaneously, or cut out more than one label from one ribbon, perfectly following the contours.

REDUCES WASTE

Thanks to the ability to set the parameters for the management of the cutting template, only the labels that meet these exact parameters are cut, ensuring a high quality product. The new software **automatically creates the template to be cut** and modifies the contour in the presence of irregular ribbons or different designs and shapes on the woven ribbon.

For optimal use of the camera the L1 optional accessory "Metal Converyor Belt" is necessary on the machine. It keeps the ribbon supported during processing.

MAIN FEATURES

» Colour sensor.

» Led stabilized white lighting.

» The software reads a wide range of shades of colours.

» The camera is very precise **< 0,5 mm** and makes it possible to cut three or more labels even if not perfectly aligned on the ribbon.

TECHNICAL DATA

TOLERANCE		< 0,5 mm
WORKABLE DIMENSIONS	*GALVOLABEL*	110 x 110 mm
	GALVOLABEL XL	200 x 200 mm
	LASERLABEL XL 2.0	200 x 240 mm
